Bond Project Construction Progress

Associated Construction Partners (ACP) and sub-contractors continue to make good progress on several pieces of the 2020 Bond Wastewater Treatment Plant (WWTP) Project.

Manholes for the sewer system were the main focus in September and October. Excavating and setting a manhole, back-filling and compacting gravity line and relocating both the 8-inch discharge bypass line and 8-inch gravity main were accomplished. In early October, ACP provided updates on the work schedule for the new dome roof for the concrete wet weather storage tanks near the WWTP. The dome cover instal-

lation is anticipated to begin February 10, 2025 and take approximately 30 days to complete.

Electrical sub-contractor, Alterman, began assembling conduits, spacers and duct banks in early October.

The next few weeks ACP will continue working on installing the remaining manholes and underground piping and begin work at Whispering Hollow Lift Station. Please be cautious when in the area of Whispering Hollow Lift Station as space is limited.

The District & Inframark Offices Will be Closed for Regular Business

Thursday and Friday, November 28 and 29, 2024
